Our programs.

The Supreme team are enthusiastic teachers, passionate about delivering fun experiences for all ages, backgrounds and abilities.

We have been providing a reliable and professional service for over 11 years, and therefore understanding the regular demand for new activities.

That is why we are continuously innovating and tailoring sessions to the needs and themes of each venue or event.

So sit back, enjoy the holidays and let us take care of the rest.

Augmented Reality

Think outside the square to navigate your way through our cryptic clues. This program focuses on direction, orientation and using a compass. Children work in teams to take part in an augmented reality hunt around their venue using iPads to provide augmented fun.

Billy Cart Bonanza

Build, test and race in our engaging and longest running program. This skillful, energetic trip down memory lane allows children to use real tools and hardware as they construct Billy Carts and simple machines, before hitting the track to test out their driving skills.

Brickworks

Bricks, Bricks and more Bricks! Imagine your children completely immersed in a world of building and imagination. This program allows the children to lead the way as they work through fun challenges followed by 'free play'. Brickworks is sure to bring out their creative side.

Codebotics

Coding and Robotics go hand in hand in this fun twist on programming. Children see the evolution of coding using 'Plugged' and 'Unplugged' forms. Commanding their robots to speak, sound like a chicken, change colour, roll and jump is just the beginning!

Commando Challenge

Fun problem-solving activities that are perfect for everyone! Children complete a range of unique activities. Team work, focus and resilience are key to mastering these challenges, encouraging each other throughout. Complete blind folded obstacle courses, balance beams and much more.

Hip Hop

Get down with the latest moves as students express themselves, build confidence and dress up to look the part. This session is all about the crazy fun environment. There are no wrong moves and we will get everyone dancing!

Silly Science

Bring out the children's inner scientist. Children will be divided into groups and will complete a range of exciting hands-on science experiments.

Our innovative stations allow students to investigate chemical reactions, slime making, rockets, magnetism and even a science museum.

Sports Jam

Children get active within a huge rotation of games, all re-imagined in unique and creative ways.

Human hungry hippo, stilt racing and target shooting, just to mention a few. All whilst dancing to an upbeat soundtrack that blasts out in the background.

Shelter Survivor

Test the children's survival skills as teams work within a budget to build shelters that withstand the harshest elements!

When the rain comes, will your team stay dry? This is an outdoors adventure activity that should not be missed!

Treasure Chest Quest

Challenge children mentally as they move through ancient historical worlds.

They will be immersed in an imaginative world, searching for clues and props to help them on their journey. Can the children discover the codes to unlock the treasure!

World Dance

Be immersed in our culturally inspiring dance experience. Combine vibrant sounds, creative dance steps and traditional dress from around the globe.

Children will step out of their comfort zones and build confidence in this fully immersive celebration.

Young Yoga

Twist, bend, balance and stretch. Children express themselves through yoga games and movements.

Activity cards, games, music and challenges makes this session fast paced, fun and unlike any other yoga program.

What others say about us.

“Incredible! We have already booked two more for the next holidays. Great program, would recommend!”

“This was a fantastic activity for the kids to do as it helped them learn new facts without even realising. We would highly recommend this activity to any school or holiday program!”

“It was very clear what the kids had to do and the children were very excited about the games and activities provided. We can't wait to do this again with the kids.”

“The instructor kept the kids engaged, was organised and adjusted activities as needed. Would highly recommend the incursion. A great experience.”

OSHClub

“Fantastic incursion! We have a lot of younger children and find they often lose interest in incursions, however that was definitely not the case today!”

“An excellent instructor. She made sure that the students were involved, enjoying themselves and all learning something.”

We cater for all events.

We are experienced in tailoring activities for large special events. Anything from community days to science fairs. The Supreme Team are always honoured and humbled to be a part of something bigger. We love an excuse to get creative and celebrate, so talk to us about your needs and let's see how we can help.
