# Supreme Incursions
ChatGPT Templates

Getting started on a unit planner:

I need **number** detailed **curriculum** lessons, aligned with the **year level Victorian curriculum**, focusing on **content descriptor**.

Every lesson should be set out in a table and include a clear learning intention, success criteria, and a detailed description of the activities within the lesson.

These activities should encompass **a unit planner model.**

Additionally, I have resources such as **insert resources available.**

Handy Hint:
Once ChatGPT has created your resource or lesson plan, give it feedback and tell it what needs changing!

Example:

I need **8** detailed **Numeracy lessons,** aligned with the **level 2 Victorian curriculum,** focusing on the descriptor **"Compare and order several shapes and objects based on length, area, volume and capacity using appropriate uniform informal units."**

Every lesson should be set out in a table and include a clear learning intention, success criteria, and a detailed description of the activities within the lesson.

These activities should encompass a **whole-class introduction, a worked example, independent or group work for the main activity, and a concluding whole-class reflection.**

Additionally, I have resources such as **unifix blocks, stationary, and various containers to use.**
